

REVERSAL

WHITE PAPER

VERSION 4

THE NEXT
GENERATION OF
SELF REGULATED
FINANCIAL SYSTEM

2018

INTRODUCTION

The potential economic growth for ordinary people that adopt the technology of cryptocurrency and blockchain is great.

We assign ourselves to set up a mechanism of creation of steady opportunity that will be allow to fill the gap between blockchain and its generalised adoption.

People who use it dont actually worry about how it works but they dont want it to work and enable a daily use.

Our objective is to make know the platform REVERSAL SERVICE accessible and vital.

The goal of this whitepaper is to supply a written look of the way whose we anticipate the growth of REVERSAL ecosystem.

PROBLEM

In the current economic systems some institutions have the control of all financial transactions. Opportunities and wealths own those who produce money , central banks , bankers and financial ones. Ordinary people are pawn in this game. Most consumers are ended from a manner or another. Banks want us to always borrow in order to pay interest upon our borrows without being able to live decently and ensure a better future.

And what we live in a world where all transactions were made from person to person without any intervener and cost almost nothing ?

And what endebt ourselves became a very bad idea and the value of the money put aside increased every day ?

It is the vision we have for the world and it is thus REVERSAL works. A universe of new opportunities unlike to banks wich drop in weak position these opportunities.

We propose the creation of a self-regulated financial system based on different blockchain technology subjacent : ARAGON ; REVERSAL ; ETHEREUM

« Build a financial ecosystem for ordinary people »

Multiple blockchain technology

« Imagine a
world of
